

BOOK GENESIS 5

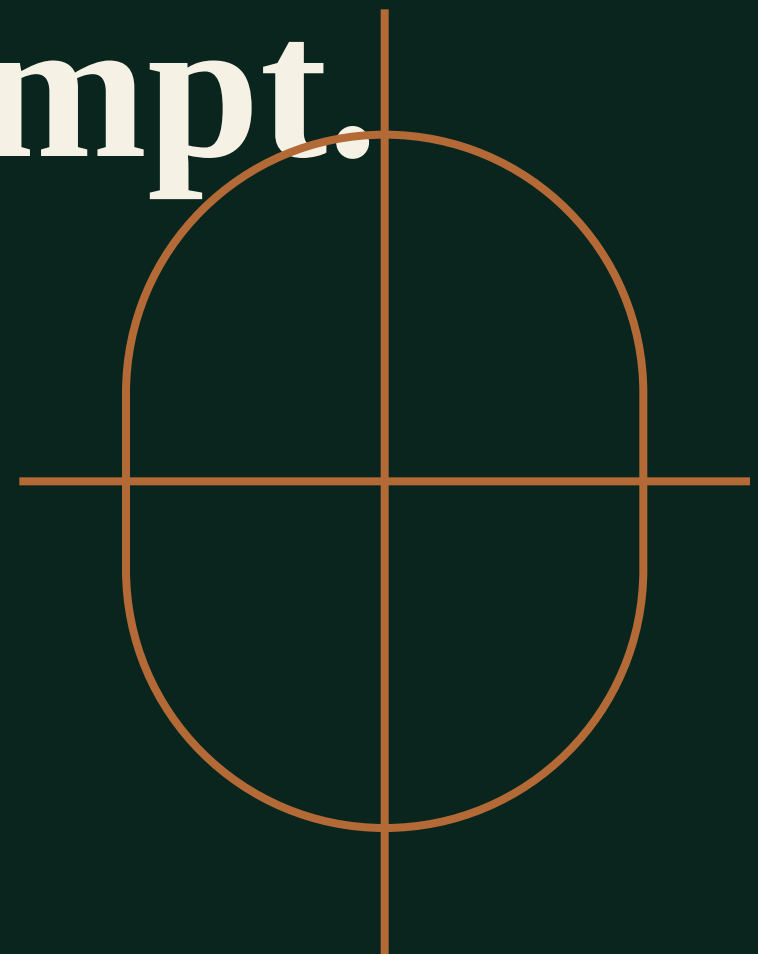

Imagination Edition

Creativity is the starting point. The story is yours.

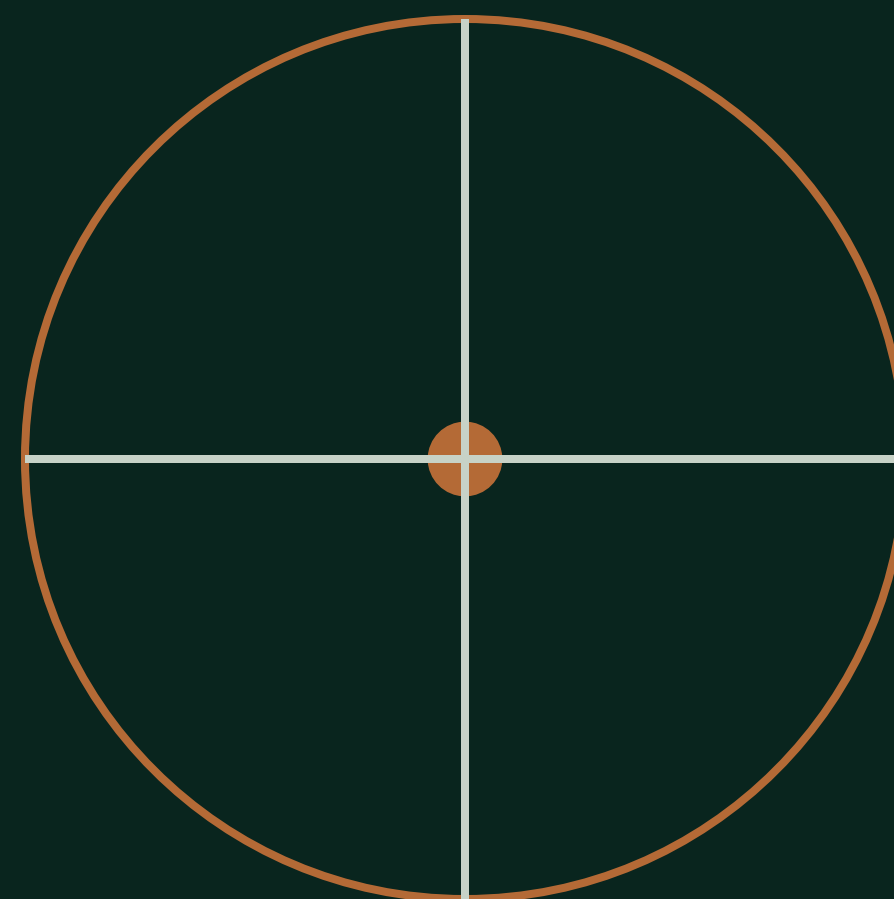

An idea deserves more than one prompt.

Turn a premise into a project you can
inspect: brief, outline, chapters, feedback,
audit, review, export.

The draft is not the finish line.

Keep attempts, reader feedback, and the
canonical chapter on disk. Pause. Resume.
Revise with context.

Reports are not approval.

A manuscript audit can return MAJOR
REWRITE and stop the workflow at
awaiting_revision.

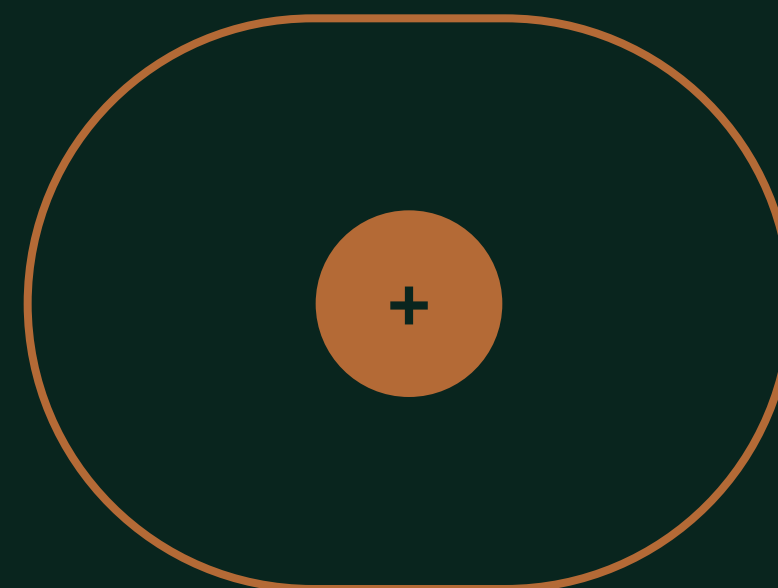

Beta evidence, stated plainly.

279 local regression tests. One 1,910-word smoke story. Model evaluation only. Human validation is still pending.

Try one chapter.

Report what breaks. Contribute what improves the craft.
